SENATOR HARRIS: ...there was a section in the bill where the Nebraska Educational Television Commission and it says "shall produce a documentary film, not less than one hour in length, depicting the various aspects of Nebraska state government and personnel of the various branches of state government shall advise, assist, and cooperate with the Commission so as to assure as accurate as possible a picture of state government and the relationship between the branches thereof. The film when completed..." and so on, and this is wording that might be construed as the order for the remaking of this film which has been made and has been shown and then is in the possession of the Educational Television Commission at the present time.
